

Sustainability Report 2023 Planet

GHG emissions:

12.5% 

reduction of total
emissions intensity,
scope 1 & 2,
market-based,
per litre of
finished goods
(2023 vs 2022)

Materials & packaging:

93.1% 

of waste (**mostly packaging**) is recycled
& recovered

31% 

of recycled content in our packaging
(on average)

28.3% 

of recycled content in our
glass bottles

Water & Energy:

3,3l 

water used* per litre of finished goods

11.3% 

reduction of direct energy intensity per litre
of finished goods (2023 vs 2022)

96.8% 

of total electricity used comes from
renewable energy sources (GOs)

*water used in factories and warehouse, incl. water in
the final product
