

KNEX AI Agent Pack

KNEX AI Agent Pack for E-Business Suite brings embedded, agentic AI into core business workflows - simplifying complex processes, improving efficiency, and enhancing decision-making. Designed to work within existing EBS environments, it transforms traditionally rigid user experiences into intuitive, guided interactions for accounting and finance users.

/ Features

> Payables Knowledge Agent

- Delivers instant answers to operational AP questions using live EBS data. Answers key queries including invoice status, pending invoices by vendor, and payment or void status

> Receivables Knowledge Agent

- Provides real-time visibility into customer invoice status, unpaid balances, and AR aging.

> Procurement Knowledge Agent

- Provides visibility into purchasing activities.
- Helps users identify unmatched receipts, uninvoiced purchase orders, and items needing accrual.

> General Ledger Knowledge Agent

- Delivers access to General Ledger data, offering insights into account balances, journal status, and period status.
- Accelerates responses to accounting inquiries with real-time insights

/ Values

- > Simplifies complex business processes through agentic AI
- > Improves employee experience and reduces manual effort
- > Enhances clarity, accuracy, and decision-making
