

Turn Google Cloud complexity into operational control.

Bring cloud spend, AI usage, BigQuery, and security into one view, with the visibility to identify risk, control spend, and act before issues reach the invoice.

One Platform. Four Areas of Control.

Spend Visibility

Understand current and forecasted cloud spend by project, SKU, and label, with AI-assisted analysis to surface what is driving cost.

AI Cost Control

Track model spend, token usage, and blended rates across Vertex AI, with anomaly detection and controls to stop unexpected spend.

BigQuery Efficiency

Identify costly queries and usage patterns down to the user level, helping teams understand where BigQuery spend is being generated.

Security & Governance

Surface critical security findings and continuously assess your environment against 200+ CIS checks.

Know where cloud spend and risk are moving before they become problems.

Cloud Companion continuously surfaces changes across cloud spend, AI usage, BigQuery, and security, giving teams a clearer path from visibility to action.

200+

CIS checks run continuously

1-click

AI spend control

Simple, Predictable Pricing

Flat fee. Never a percentage of cloud spend.

	BASIC	PRO	ADVANCED	ENTERPRISE
Spend analytics and alerts	Daily	Hourly	Hourly	Hourly
BigQuery and AI analytics	Not included	Hourly	Hourly	Hourly
ML anomaly detection	Not included	Included	Included	Included
Security center and alerts	Scans only	Scans only	Full suite	Full suite
Monthly pricing	Free	\$750 flat	\$1,500 flat	Custom

Standard support is included from Pro up, and available on Basic for \$300/mo. Advanced adds a \$150/mo pen-test credit. Enterprise applies to accounts above \$100K monthly spend and can bundle Managed Cloud.

Get a clearer view of your Google Cloud operation.

See where spend is moving, where risk is emerging, and where your team can take action.
